Abstract

All abstracts must be in English and be at most 2 pages long. No page numbers should be present. Text must be justified. All text must be 10-point, single-spaced type, with 12-point vertical spacing, using either Computer Modern or Times Roman fonts. Colored text should not be used. Use one-half line space between paragraphs, with no indent.

The height of the text must be 23.5 centimeters (9.25 inches); width must be 17 centimeters (6.69 inches). Top margin must be 3 centimeters (1.18 inches) and left margin must be 2.5 centimeters (0.98 inch).

There is only one section with the abstract. A list of keywords should be given after the abstract and a list of basic references at the end.

List all your references in alphabetical order, at the end of the abstract. You can use any style for references, as long as you use it consistently. Preferably, references should be numbered according to their place in the bibliography, not the order they appear in the text. In the main text, references could appear as [1] and [2], or perhaps as (TheAuthor 1996) and (Another 1800).

We suggest that, if it is at all possible, you prepare your abstract using the L^AT_EX system. First install the `abstractisipta2013.sty` file, which you can obtain at the ISIPTA web site. You install the file by placing it at the same directory as you have your abstract file.

You can also obtain the source file for this document at the ISIPTA web site. You can use this file, called `abstractisipta2011.tex`, as a template for your article.

If you use L^AT_EX2e, start the abstract with:

```
\documentclass{article}
\usepackage{abstractisipta2013}
```

If you are not using L^AT_EX, please take some time to compose the headings of your abstract.

Place the sentence “8th International Symposium on Imprecise Probabilities and Their Applications, Compiègne, France, 2013” with 8-point type, centered. Skip 3 points and then place a black horizontal rule, 0.5 millimeter (0.0019 inch) tall. Skip 0.7 centimeter (0.28 inch) and place the title, centered, with bold 16-point type. All words in the title should have initial caps (exceptions can be made to small words).

Authors’ names are centered, initials are capitalized. The lead author’s name is to be listed first (left-most), followed by the co-authors’ names.

Keywords. Instructions, typing, figures and tables, fonts, L^AT_EX.
